

Stock Logistics Solutions

A Power Tool For Your Business

Quality builders have relied on Stock Building Supply for over 90 years because we never stop investing in our service and building solutions. Our newest innovation, Stock Logistics Solutions, is no exception. Stock Logistics Solutions is **GPS-based technology** that provides real-time order status and delivery tracking information, 24/7 on the Web or your mobile phone. Technology this powerful gives you **visibility into your business that no one else in the industry can match.**

In addition to presenting you with information to manage your business in new ways, Stock Logistics Solutions provides us with the tools we need to continuously improve our service. **To serve you better, faster and more reliably. To proactively address any issues before they become problems. To lighten your load so you can focus on powering your business to the next level.**

“ Stock is so far ahead of the game. Nobody else offers this. You blow them all away as far as the technology you are putting in place. ”

Why use Stock Logistics Solutions?

- Instant and accurate answers to “Where’s my order?”
- 24/7 Web-based access, at your convenience
- Easy to use, intuitive system means you can get started today
- User-controlled email or text delivery notifications save you time
- Ability to easily and quickly verify credit pick-ups
- Facilitates scheduling of sub-contractors, knowing what will be delivered and when

Stock Logistics Solutions is included as part of the value-added package of solutions Stock Building Supply offers all customers.

What if you could **spend less time** tracking orders, verifying credit pick-ups or driving to job sites to check on deliveries?

Drivers are trained to take photographs showing all the necessary delivery information.

Where's my order?

Stock Logistics Solutions' email and text notifications, with links to photographs of materials delivered, provide you with peace-of-mind that your order is where you need it when you need it.

Growing

With the Green Movement

- Electronic notifications mean less fuel wasted on trips to verify whether deliveries are on the job site
- Better load planning puts fewer trucks on the road and less emissions into the air
- GPS technology points drivers to the most efficient routes
- Web-based access significantly reduces paper consumption

“ Efficiency matters. It is a great tool for builders who carry multiple homes in different communities. This is an asset to my day to day operations and the tools I use to get the job done. ”
